

Environmental Policy Statement

Of

The Link Care Nursing Agency

The Link Care Nursing Agency recognises that its operations have direct and indirect impacts on the environment. The organisation sets out to minimise these impacts and operate in an environmentally responsible manner whilst seeking to ensure that all its activities fully comply with relevant environmental legislation and industry codes of practice. To deliver this policy the company commits to:

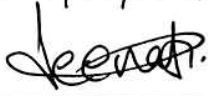

- Integrate environmental considerations into all business operations where cost effective
- Ensure the prevention of pollution by virtue of the company's activities through appropriate training, education and communications with all personnel working on its behalf.
- Ensure the maintenance of emergency procedures to deal swiftly and effectively with any significant environmental incidents that may arise.
- Conduct periodic environmental reviews and set targets for continuous improvement.
- Encourage all staff to work in an environmentally responsible manner and promote individual good practice.
- Make efficient use of energy, water and other natural non-renewable resources.
- Minimise waste production by reducing consumption and recycling wherever possible.
- Progressively improve the environmental efficiency relating to the organisations' own transport and travel.

All employees are responsible for and have a duty to work towards the principles contained within this policy.

This policy is achieved through the implementation and continuous development of an Environmental Management System that is reviewed periodically to ensure that it continues to meet the requirements of the international Standard ISO 14001:2004.

The management ensures that this quality policy is communicated to all staff at all times.

Date: 24/8/2012
